

MAHAVEER SALES CORPORATION

MRFS: LDPE , HMHD , PP POLY BAGS , SHEET & TUBE

**SPECIALISED IN : ANTISTATIC , VCI POLY COVERS , ROLLS & TUBE & NON FLAMMABLE POLY VINLY SHEET AND
SURFACE PROTECTING TAPES**

Plot no: 40, Thanjai sengundra nagar, Vilangadupakkam , Chennai -600 052.

We are a highly established and reputable plastic & flexible packaging material company. Understanding the growing significance of quality plastic packaging, M/S, **MAHAVEER SALES CORPORATION**, was established in 1992 to cater to a wide range of industries including food and beverages, FMCG, personal hygiene, apparel, agro-chemicals, pet foods, cosmetics, automobiles, confectionary, pharma, e-commerce, banking & logistics etc.

Our company offers superior quality products such as LDPE , HM HDPE POLY BAGS ROLLS & SHEET , BOPP bags, GARBAGE bags n roll,

ANTISTATIC POLY BAGS . SHEET & ROLLS , VCI POLY BAGS , SHEET & ROLLS, NON FLAMMABLE POLY VINLY SHEET AND SURFACE PROTECTING TAPE , compostable bag on roll, stretch flim, BOPP self adhesive tapes, LDPE shrink flim, PP strap, PET strap, Recognized as the one-stop

solution for plastic & flexible packaging material, we propel the adoption of every product. Our dedication and commitment to our business drive everyday operations, and our extensive knowledge, workmanship, quality products, and service separate us from others in the market and provide the competitive edge and distinctiveness.

HISTORY OF OUR COMPANY

The Vision to cater to the packaging industry was conceived of in the year 1992, and thus **MAHAVEER SALES CORPORATION** born. Since then, our growth has been one of phenomenal success with a portfolio of prestigious clients for the supply of an extensive range of Plastic Packaging Materials. These are manufactured by using superior quality of material bases sourced from reliable vendors to ensure reliability and durability. What's more, we boast an entire gamut of packaging products in addition to the foregoing.

These are highly appreciated for their accurate dimensions, elegant designs, alluring color combinations, water-resistance, smooth finish, and longer functional life. Owing to the unique features, these are widely used in varied industries such as food & beverage, pharmaceuticals, fertilizers, chemicals, agriculture, automotive, etc. Being a quality conscious company, we lay special emphasis on all aspects of quality and drive our efforts to deliver a world-class range of Plastic Packaging Material to our esteemed clients.

To that end, we have set up an advanced in-house quality control department that is outfitted with the latest machines and tools. The quality control unit is effectively managed by highly qualified and experienced team of quality inspectors, who stringently monitor the complete production process right from procurement of raw material still the final dispatch of finished products

MAHAVEER SALES CORPORATION

MRFS: LDPE , HMHD , PP POLY BAGS , SHEET & TUBE

**SPECIALISED IN : ANTISTATIC , VCI POLY COVERS , ROLLS & TUBE & NON FLAMMABLE POLY VINLY SHEET AND
SURFACE PROTECTING TAPES**

Plot no: 40, Thanjai sengundra nagar, Vilangadupakkam , Chennai -600 052.

LDPE POLY ROLLS

This is LDPE poly rolls with various sizes and we have customized LDPE , HM HDPE and PP poly bags as per customer requirement , which is widely use in packing the finished goods , It come in various size and thickness , we maintain standard thickness starting from 51 microns as per Government rules & regulations . It been used in each and every industries

Stretch Flim
Machine grade &
Manual

Stretch film is a highly stretchable plastic film that is wrapped around the items . the elastic recovery keeps the item tightly bound , in contrast shrink

BOPP PACKING TAPE

The commonly used adhesive tape that are used in sealing medium to heavy carton sealing , shipping, inventory management and in logistics industries are actually are bopp tapes in abbreviated biaxially oriented polypropylene

STRAPPING
BELT

Strapping, also known as **bundling** and **banding**, is the process of applying a [strap](#) to an item to combine, stabilize, hold, reinforce, or fasten it. The strap may also be referred to as *strapping*. Strapping is most commonly used in the packing industry

SPECIAL KIND OF POLY FILMS

VCI POLY FILM , SHEET , BAGS , & ROLLS

VCI is an acronym for Volatile Corrosion Inhibitor. When you combine VCI compounds with ferrous or non-ferrous metal in an enclosed space like a bag, container, tool box, or storage bin, something magical happens. VCI molecules are released and they are attracted to the surface of the metal just like a magnet. Even more amazing, the VCI molecules attach themselves to the surface of the metal and they form a thin, protective shield. Just imagine, it is like covering metal or metal parts with a warm, cozy blanket that keeps the rust away.

ANTISTATIC POLY SHEET , BAGS & ROLLS

An ANTISTATIC POLY SHEET ,BAG & ROLLS , is a bag used for storing electronic Components, which are prone to damage caused by electrostatic discharge (ESD). This bags are usually plastic LDPE POLYTHENE have a distinctive colour (PINK, BLUE and BLA The polythene variant may also take in the form of bag, sheet and roll. A protect Device can be packed inside the antistatic bag, antistatic can be used for all paint shop Booth, mostly the use rolls. An antistatic sheet is used to wrapping there device . It is important that the bag only be opened at static-free workstation.

FLAME RETRATDANT POLY FILM

Lately, we have had more requests for our fire retardant film, known as AT-FR(ANTISTATIC — FIRE RETARDANT). AT-FR is that not only is the plastic film a clean halogen-free fire retardant (FR) polyethylene film, but it also dissipates static charges or arcing. Isn' t that smart, not only to prevent fires after ignition, but also aiding as a barrier in preventing fire from igniting in the first place. Being static dissipative, AT-FR is great for keeping electronic devices safe from electrostatic damage (ESD).

Let's step back for a moment to review. Some plastics run the risk of igniting, so **FR-additive films** prevent both ignition and flame-spread, which can prolong escape time; obviously very important for safety reasons. Typically FR films and products are used by ship builders, construction companies, aerospace companies, and militaries in areas where work must be accomplished in small spaces, or where welding sparks can ignite supporting materials. Halogen-free FR products, provide a viable alternative to using traditional **halogenated** FR additives, particularly for applications in electrical & electronics, building, and transportation interior markets. Halogen-type FR films are considered environmentally challenging.

SURFACE PROTECTING TAPE
TRANSPARENT

SURFACE PROTECTING TAPE
BLACK & WHITE

Transparent surface protection tapes are designed to safeguard surfaces from scratches, dirt, moisture, and minor impacts without altering their appearance. Here are the key details:

Types:

Polyurethane Protective Tape: Ideal for automotive, aerospace, and industrial applications.

Polyester Protective Tape: Suitable for polished metals, plastics, and glass.

Low-Density Polyethylene (LDPE) Film Tape: Used for temporary protection during transport or construction.

Features:

Transparent for visibility.

Scratch, abrasion, and moisture-resistant.

Easy application and residue-free removal.

UV-resistant options for outdoor use.

Applications:

Protecting painted surfaces, electronics, glass, stainless steel, and floors.

Automotive paint protection, screen guards, and furniture covers.

Industrial equipment during manufacturing, shipping, or installation.
